STORAGE WALL – Space Saving Solutions

**Our storage wall offers the scope to create efficient storage systems in any office environment.**

Functional, efficient and adaptable, it grows with your business. Specified at the start of a new build or during an office refurbishment, it can be reused over and over again. Additional modules can be bolted on to the system, creating organic growth and adaptation for your office environment as you need it.

Combining innovative design with clever construction, our storage wall allows every last bit of valuable office space to be used to its full potential. This enables you to create a unique and flexible working environment whilst maximising all available floor space. Whether used as freestanding units to divide a room, or against existing walls, it offers a solution for every situation.

With a range of different unit styles, our storage wall integrates seamlessly with the space around it. Allowing flexible configurations, it can also grow, adapt or even relocate as your requirements change. As well as offering efficient storage, units can also be designed to accommodate multimedia presentation facilities for a truly clutter-free working environment.

Individually designed to fit from floor to ceiling and from wall to wall, maximising the space in any given room. The simple yet robust construction offers strength, stability and durability. And because all units are made to your specifications in our factory, you'll enjoy the minimum of disruption.

# Specifications & Features

Functional and efficient storage is a necessity for the modern working environment; and for our storage wall, this is just the starting point. In addition, we can work with you to create bespoke solutions that meet your every need.
